

Please vote no on 2 June to relaxing the regulations that limit the consolidation of media enterprises! Freedom of information is hardly true in the U.S. these days now that big business owns much, if not all, of the TV/radio media. The further consolidation of media enterprises is a more serious threat to U.S. national security than Irag is proving to have been. We don't want a one-party system in the US because of what you do.
